

## Packing & Shipping

### Oneplus Packing & Shipping System

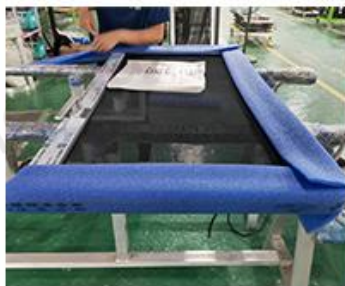

- ▶ Oneplus's professional packing system guarantees all products are delivered safely without any damage. We use pearl cotton and plastic corner protectors to wrap.
- ▶ First, we wrap around the entire window and door with pearl cotton, and then wrap all the corners with plastic to avoid any damage or clashes.
- ▶ Then, the exterior aluminum frame is covered with sticky plastic film to avoid surface scratches.
- ▶ Lastly, we put our products into a durable non-fumigation plywood crate/case to avoid any possible damage during transportation.
- ▶ With years of experience in our products' worldwide shipping, we could guarantee our products are delivered to the final destinations safely without any damage.
